Damascus, May 23. A Syrian Army spokesman today accused Israel of failing to carry out fully the Security Council's resolution instructing her to stop draining the Hulch Marshes on the Syrian border.

The Israeli Government' announced last night that it had decided to discontinue drainage in an area of seven acres which it said had been the cause of the recent drontier clash(s.

It added, however, that draining operations avould be shifted to other parts of the demilitarised zone which were not affected

by the dispute. The Syrian spokesman said today that the resolution of the United Nations Security Council clearly laid down that all drainage work in the zone was to be stopped, no matter whether it was on the Syrian or the Israeli

Here's one, for example, that made a victim of a poor innocent bridge player who never did any harm

"West opened the six of hearts, East played the lack, and South won with the king. Declarer led a club to the king and returned a club from dummy. East had to find a diseard.

"Naturally, East wanted his partner to continue hearts, Hence East wanted to throw a discouraging card in spades or diamonds. However, of his cards on spades and diamonds were too big to be discouraging. East finally threw the seven of spades on the theory that the seven of spades was lower than the eight of diamonds.

"South let West win the second club, hoping against hope that West would not continue the hearts. As it happened. West thought that South might still have the queen of hearts; and he therefore wanted to give East a trick so that East could lead a heart.

"Hence West led a spade-and South naturally wrapped up ten tricks. When we discussed the hand later on, we agreed that it would have been no better if East had discarded the eight of diamonds Then West would have led a diamond when he won the club trick. How does East find a discour-

Tuberculosis continues to be the most important single cause of morbidity and mortality amongst the adult population, and the incidence of the disease continues to mount. The total of 9,267 new cases and 3,263 deaths were reported during the year. These are the official figures, but the actual numbers may be very much higher cases for one reason or another not being reported. It is difficult to estimate the total number of cases that exist in the Colony, but it must amount to many tens of thousands, and it is safe to say that at least 1 person in every thousand died during the year 1950 of tuberculosis.

The tasks confronting the Hongkong Anti-Tuberculosis Association have, therefore, in no way diminished, but have on the contrary assumed even greater proportions.

The Annual Appeal now being made deserves the most earnest response from every section of the community. No contribution can be too small and none too large.

Effective aid is being rendered, but the steadily rising demand cannot be met without MONEY.

Preview Of Colonial Art Exhibition

(Our Own Correspondent)

London, May 23.

Mr John Dugdale, Minister of
State for Colonial Affairs, today State for Colonial Affairs, today attended a private view of the notable exhibition of traditional art from the Colonies being shown at the Imperial Institute as part of the Festival of Britain.

In an interview with your correspondent Mr Dugdale declared enthusiastically "This is a fascinating exhibition." It would enable people in this country, he said, to learn something about the artistic expression of people in the Colonies. In order to popularise art among the Colonial peoples the subject chould, he thought, be included in the curricula of Colonial schools. The traditional art of

schools. The traditional art of the Colonies, however, should be taught side by side with Western art. Knowledge about art could not develop in tight compartments.

The King and Queen will visit the Exhibition tomorrow; it will be opened to the public on Mey 25. The exhibits include rate examples of traditional Colonial Britain: They are representative of West, Central and East Africa, the West Indies, Malaya and the Colonial territories in Southeast Asla.

Mr William Fogg, Assistant Keeper of the Department of Ethnography in the British Musoum, who assisted in arranging the Exhibition, explained to me, "The essential fact which a visitor to this exhibition needs to appreciate-if he is not to regard the exhibits as mere curios -la that Negro Africa and other tribal areas represented mover underwent the philosophical and scientific revolution which has played such a largo part in. moulding industrial civilisation; and that by a chance of history, these Colonial cultures tieveloped in directions more conducive to the growth of art."

Recovery Israeli Pound Free Market

London, May 23. The Financial Times reported today that the Israeli pound has improved on the free market and

ascribed the recovery to the rise of Israeli holdings which had brought a considerable inflow of hard currency.

_The_Israeli_pound_dropp(d_in | the free market by Feb. 1 to a quarter of its official rate. More recently, it improved by Another some 10 percent.

The publication said, "The tendency of the free market to Bad. take a rather more optimistic view of the outlook for the Israeli pound is undoubtedly for due in large measure to indications that the Israeli Government has succeeded in materially reinforcing its foreign exchange reserves."

Israel was said to have recelved recently some fairly substantial amount i ked on loans in Switzerland and other countries and a large amount of dollars from charitable appeals in the United States.

The Financial Times said, "I the efforts that are being made to raise dollars by loan operaone new high for the year was tions in the United States are as successful as the appeal for funds for charitable purposes, i should be possible for Israel to count on keeping her head above water on the external payments account for some time to come."

The report concluded, "From now on, the Israell Government will presumably be more and more concerned with establishing a basically cound external payment position rather than with raising money needed to cover the persistent deficits. It might be wise therefore, to consider whether it would not be ndvisable to make use of the breathing space afforded by the inflow of dollars and other exchange resources to establish off 1/4 to 3/4 and soybeans were the official value of the currency at a realistic level."-United Press.

LOAN OFFER TO PAKISTAN

Karachi, May 23. An authoritative source said here today that the World Bank has offered Pakistan a \$60,000,-000 loan for developing irrigation and hydro-electric and easier. Bombay offerings projects and for extending and were reported at around \$1.02 repairing communication and to 1.63 a pound, including cost rail mellities. The sum would and freight, or 2 to 3 cents be a first installment in the above domestic parity. Sales of financing of the programme,- spot stocks were reported at Associated Press.

Firm Tone In London .

London, May 23. Most sections of the London Stock Exchange were quietly firm today. Industrials were in good demand, especially textile and engineering issues. Oil shares were well supported, and gains among gold and copper sharen were widespread, Rubber and tin atocks

were dull. Financial Times Index 130.00 .- Associated Press.
